# AT SCYLLA FINE JEWELRY...

We take pride in our efforts to provide a sustainable line of high-end gold body jewelry. The vast majority of our gold is obtained through refining jewelry that people no longer use. In some cases, we are even able use the gemstones from these pieces as well.

The objective is to recirculate existing gold - in the form of new jewelry - to avoid contributing to the detrimental effects mining new gold has yielded not only on our ecosystem, but indigenous peoples as well.

Call us to find out how we can re-purpose your solid gold jewelry.
